ADVANCED DRY EYE TREATMENTS

ENVISION

DRY EYE

The Meibomian glands on the edge of each eyelid should release the oil layer of the tear film. This layer keeps your eyes comfortable and your vision clear. These glands easily get inflamed, clogged and damaged. This cycle of inflammation is a hallmark of chronic dry eye.

Symptoms include:

- Grittiness
- Blurry Vision
- Burning
- Redness
- Tearing
- Itching

Eye hygiene is especially important with dry eye. Dirt and debris on the eyelids, eyelid margin and lashes can lead to symptoms of itching, burning and gritty eyes. Demodex mites can live on the hair follicles and exacerbate inflammation.

OUR TREATMENT DRY EYE

Forma-I & Lumecca uses radio-frequency & IPL technology to precisely heat the Meibomian glands in the eyelid. We recommend an induction series of 4 treatments 2-3 weeks apart to kick start your dry eye treatment.

- MELT AWAY CLOGGED OILS**
- PROMOTE HEALTHY TEARS**
- REDUCE OCULAR SURFACE INFLAMMATION**

PACKAGES

COMPLETE DRY EYE TREATMENT

This is the complete dry eye treatment able to alleviate symptoms after your first treatment with the best results being seen after a package of 4.

STYE / CHALAZIONS

This is a non surgical solution to rid patients of their stye without the need of going under the knife.

OCULAR ROSACEA

Our IPL Lumecca-I is a safe and effective treatment for rosacea. It can help to reduce redness, flushing, and the appearance of broken blood vessels.

DEMODEX

Demodex mites are tiny parasites that live on the hair follicles and oil glands of your eyelashes. When your eyes are dry, these mites can multiply and cause inflammation and irritation. Lumecca-I IPL can be used to kill these mites and prevent them from coming back.

DRY EYE FAQ'S

HOW MANY SESSIONS ARE RECOMMENDED?

We will recommend the ideal number of sessions to be performed based on your personal condition. Treatment times and frequency will be specifically tailored to obtain the optimal results.

WHAT KIND OF POST-PROCEDURE CARE IS REQUIRED?

Most patients do not experience any side effects and any skin reaction typically resolves within a few hours. There is usually no recovery period or downtime associated with these procedures.

WHAT CAN I EXPECT?

Most clients find the treatments very comfortable and similar to a hot stone massage.

WHAT IS FORMA-I?

This is an innovative nonsurgical procedure that delivers bipolar radiofrequency (RF) technology to smaller, more delicate subdermal layers. Designed with unprecedented safety, the small size applicator, precision RF depth control, and intelligent temperature monitoring, ensure a safe non-drug alternative.

WHAT IS LUMECCA-I?

This is an IPL treatment designed for the eye to target inflammation, ocular rosacea and demodex (mites).

HOW LONG IS THE TREATMENT?

The treatment is performed in our office and can range from 20-40 minutes.
